Project Scope and users (What and who)

- • Identify the issues/challenges you would like to address
Users' pain point(s) / need(s) / requirements
- Identify the project scope and objective clearly
- * Non- technical terms are welcome

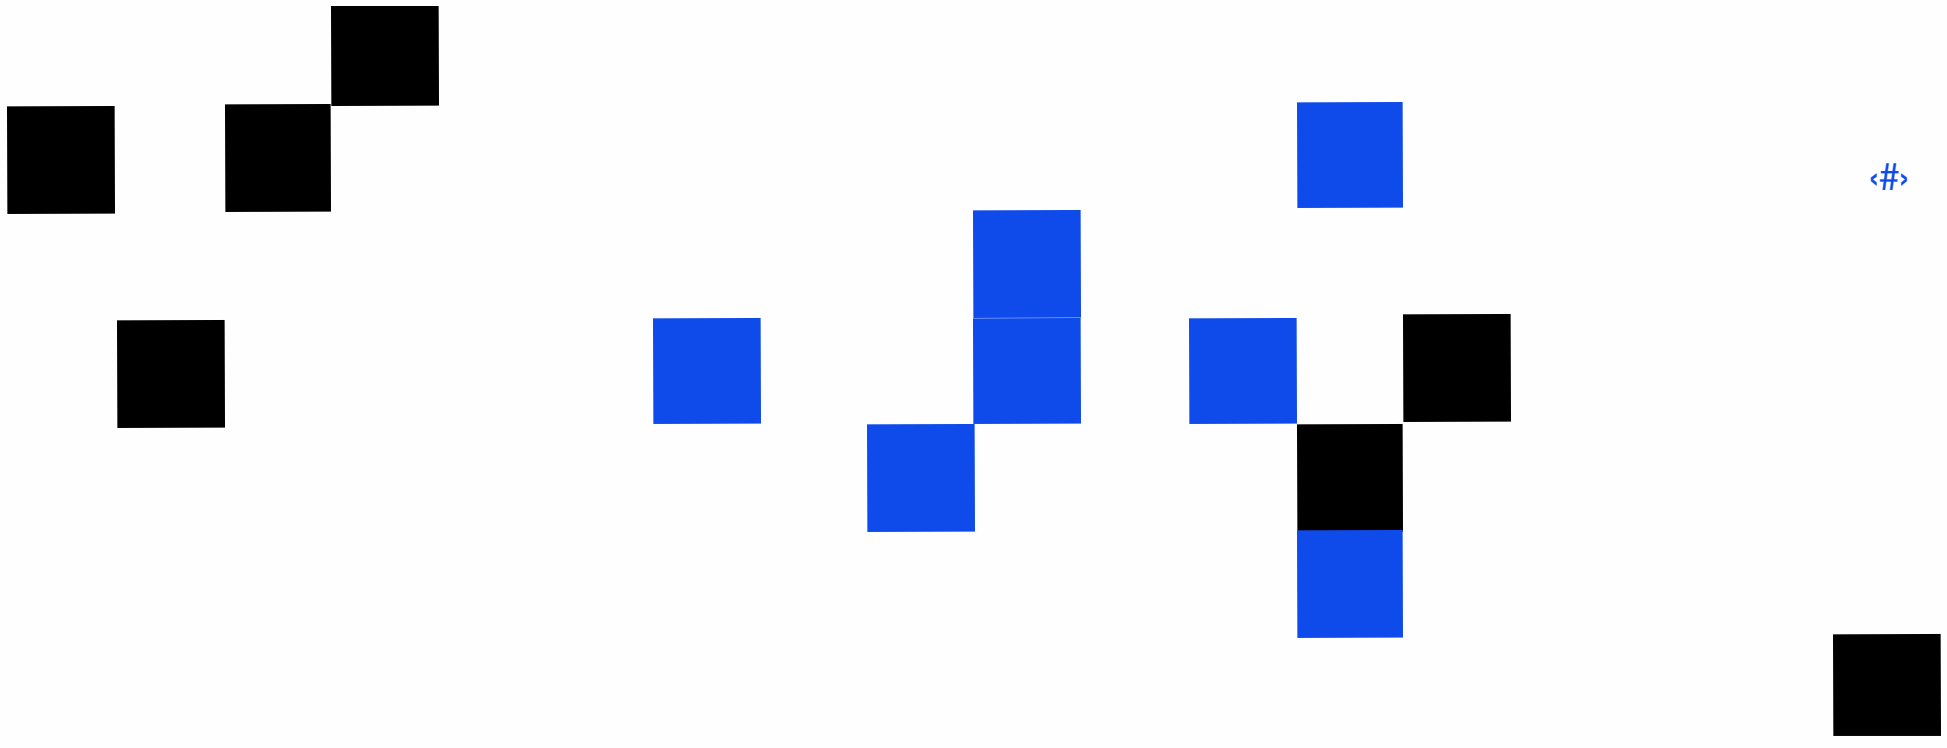

The targeted market (**why**)

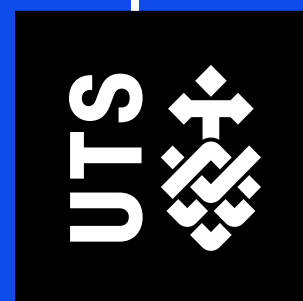

- • Address the targeted market with supported references (rough survey about news, daily life, research paper, book, and anywhere ...)
- The similar ideas, products or solutions in the current market.
- => Highlight the missing or gap(s)

Solution (How)

- 
- Introduce the potential solution looks like
 - Why and how is the proposed solution better?
 - Hint: You may have figure(s) for the imagination
- 

Thank
you

The Team
